IMPORTANT RISK INFORMATION

INDICATION FOR USE: The AngioDynamics LifeGuard Safety Infusion Set is designed to access implanted vascular ports to administer fluids and/or to withdraw blood. The LifeGuard Safety Infusion Set is a 90° non-coring needle composed of wings, tubing, a universal Luer connector, optional Needleless Y-site, tubing clamp(s), needlestick guard and needle trap that facilitates the safe removal of the needle by encapsulating the needle during vascular port de-accessing (to help prevent needlestick injuries).

CONTRAINDICATIONS: Do not use with patients showing signs or symptoms of infection at the insertion site or who have exhibited prior intolerance to the materials of construction.

WARNINGS AND PRECAUTIONS: Review all fluids to be used with this product for any incompatibility with plastics and plastic adhesives. A 10 ml syringe or larger is recommended. Clamp infusion set when not in use. Device is intended for single use only. It is non-pyrogenic and non-toxic. Inner contents are sterile unless package is opened or damaged. Do not resterilize. Carefully read and follow all instructions prior to use of the device. Failure to do so may result in patient complications.

CAUTION: Federal (USA) law restricts this device to sale by or on the order of a physician.
