

STARSYSTEM

Adept Medical introduces the STARSsystem. A combination of the STARBoard, STARSsupport and STARTable to become a complete, clinically engineered solution for radial access procedures.

STARSsystem provides unequalled patient comfort and ease of use for clinicians. Designed to work with any cardiac or radiology procedure table, the STARSsystem is quick to install and adjust to variations in patient size. Setup is achieved in seconds with no consumable components required.

reddot award 2015
honourable mention

KEY FEATURES

Clinician design

Scatter Shielding

Fits all tables

Quick set up

Easy positioning

Carbon fibre

Ergonomic surface

STARBOARD

The key function of the STARBoard is its ability to present the patients wrist in the extended position whilst access is achieved, then simply return it to a more relaxed, medially-rotated position, with the arm at their side for the duration of the procedure. Adjustments can be made at any point during the procedure beneath the sterile drapes.

A simple support strap around the upper forearm eliminates the need for taping restless patients.

Crafted in carbon fibre for superior strength, radiolucency and durability, the STARBoard is extremely light weight and compact.

The unique, one-piece, "foldaway" design makes it easy for nursing staff to handle and takes up minimal storage space.

STARSUPPORT

STARSupport connects to the STARBoard after radial access is gained facilitating left arm procedures for superior patient comfort.

STARTABLE

STARTable not only provides clinicians with an adjustable work surface, the vertical shield reduces X-ray scatter at neck height by an additional 80%.
